

Expand *Modular*

# Expand Modular

## A Large-Scale, Adaptable, and Strikingly Modern Panel System.

Expand Modular Panels are designed for exterior applications that require a modern aesthetic. Manufactured with a coverage of 20-1/2"x60" and with a variety of uses from accents, soffits or full walls, this system is truly adaptable. One inch horizontal reveals are integrated into the hidden fastener design while vertical reveals are achieved with a transition trim. Once the panels have been folded, rigid foam is securely bonded to the back giving the panel the strength and support allowing for large flat and smooth panel faces. Between the hidden fastener system and utilization of our existing trim catalogue, Expand Modular allows for an uncomplicated installation compared to much more elaborate systems on the market.

Panels can be cut and modified on site to create the perfect fit without the need for additional sub structures, perfect for both new construction or as part of a renovation/retrofit. Expand Modular is offered in 24 gauge material which allows for the maximum variety in our standard colours & specialty finishes. Contact Forma Steel for more information on this product.

### Specifications

Wall Coverage: 20-1/2"

Fasteners: Hidden

Installed with Reveal on all Four Sides

Panel Size: 20-1/2" x 60"

Available in 24 Gauge Standard & Specialty Colours

Installed on a floating clip system, ideal for thermal expansion and contraction

Foam Reinforced Panel

Recommended to Install on Minimum Solid Substrate of 1/2" Plywood, Building Wrap/Membrane, & Drainage Mat.
