

FormaLoc

Hidden Fastener Standing Seam Panel

The FormaLoc panel system is a hidden fastener standing seam panel that offers easy installation for roofers and DIY homeowners alike. Available with striations or minor ribs, FormaLoc works well for both roof or side panel applications. With long clean lines, this panel system provides recognized standing seam performance, while remaining an affordable product for a wide array of projects. Forma Loc should always be applied over solid substrate.

Flat Pan available with Striations or Minor Ribs

Striations are recommended as they are more effective at minimizing oil canning over Minor Ribs

Standard 29 Gauge Colours * Also Available in 26 Gauge

Only Available in 26ga

Specifications

Roof & Wall Coverage: 12" - 16"

Hidden Fasteners

Panel Length Up to 35'

Recommended Roof Slope: Greater than 3:12

Substrate: 5/8" Standard Plywood

UL - Uplift Class 90

Suitable for climates with high wind, high snow accumulation & extreme temperatures

FORMA PLANK

exclusively by

FORMA STEEL

Elevate

Your Project with Forma Plank

The Ultimate Wall Panel

Forma Plank is a modern steel cladding solution offering stunning colours and textures in an easy-to-install panel system that will effortlessly make your next build stand out from the rest.

Crafted from 24 gauge steel, Forma Plank is stronger than most other siding options. Backed by a minimum 30 year warranty ensures your plank won't chip, fade or peel.

Economical, simple and amazingly versatile, Forma Plank can be used in a variety of ways, both on exterior and for interior applications.

Bold. Durable. Versatile.

Paired with our Woodgrain Series finishes, Forma Plank gives the same warmth and aesthetics of wood siding but with the strength of steel to ensure a much longer lifespan.

Also available in over twenty 24 gauge colours and our new Textured Steel Series, there's a style to suit every project. Use Forma Plank as an accent, fascia, wainscoting, or to clad entire walls to achieve an exterior that stands out in every design.

The *Smart* Siding Solution

Forma Plank is available in two standard coverages with lengths up to 26 feet. A favourite among contractors, the Forma Plank panel is equipped with a complete set of trims for easy installation every time, and features a clip system ideal for thermal expansion & contraction.

This versatile panel can be installed vertically or horizontally, in varying widths, and is easily integrated with standard cladding profiles, including our Interloc Soffit Panels System.

Custom Lengths

We manufacture the product as it is ordered, allowing for custom lengths based on your exact project dimensions. Only pay for the amount of product you need to get the job done.

100% Canadian

Forma Plank is crafted in Fort Macleod, Alberta, Canada by Forma Steel for over 30 years. Our experienced team is eager to assist you with your project from initial conception through to installation.

Big or Small?

No project is too small - Forma Plank can be used as a small accent on residential homes, or included throughout an entire retail office - blending seamlessly into any design.

Board & Batten

Hidden Fastener Steel Cladding Panel

Get a longer lifespan and more design possibilities with our steel upgrade on the popular Board & Batten cladding panel. The batten extrusions provide long clean lines and the shadows they create add dimension and interest to any building design, especially when paired with our Textured Colour Series. The panel system provides a 9.5" coverage, with a 2.25" long batten extruded at just under 0.5" - keeping it flush with other popular cladding profiles. Easy installation with a clip system, and no exposed fasteners makes this a simple yet stylish cladding option for residential and commercial applications.

ShipLap

Hidden Fastener Steel Cladding Panel

Shiplap is another upgrade to a traditionally wood-cladding style from Forma Steel. Our steel ShipLap panel is a slanted plank panel, usually installed horizontally, and can be used for both internal and external applications. Easy installation with a clip system, and no exposed fasteners makes this a simple yet stylish cladding option for residential and commercial applications. The panel is available in a 6" coverage, with a depth at the widest part just under 0.5", keeping it flush with most other popular cladding materials. Shiplap pairs well with other Forma Steel cladding options, including 7/8" Corrugated, Forma Plank, and Board & Batten.

Interloc Series

Wall & Soffit Panel System

The Interloc Wall & Soffit Panel System is a smooth wall panel that can be installed both horizontally and vertically, and is commonly used as a soffit panel with perforations. This hidden fastener standing seam panel comes in a variety of coverages with options for flush wall or 0.5" reveal.

Depending on the coverage chosen, the Interloc Panel comes in a flat pan, with v grooves, with perforations, or a combination of these options. Available in our Standard 24 gauge colour series, this panel can also be produced in our Woodgrain Series, Textured Series, and PVDF Finishes.

Clip Loc

Floating Clip Wall Panel System

The ClipLoc Panel System provides the ease of installation like our Nailstrip panel, but with the flexibility of a floating clip system. Clips allow the panels to expand and contract with the temperature changes without causing strain or tension on panels or fasteners. Metal roofs installed with a floating clip system not only have longer life spans than fastener systems, but they can achieve the same beautiful aesthetic and are highly customizable. ClipLoc allows for unique configurations when designed in a varied width pattern as seen above.

Mechanical **Loc**

Standing Seam Panel System

Mechanical Loc is a commercial grade panel that is mechanically seamed and installed with a concealed clip system. This panel is ideal for shallow sloped roofs. Available in 2", 1.5" and 1" seam heights, the Mechanical Loc panel system creates long clean lines with wide spans, provides superior weather-tight protection, and allows for thermal expansion and contraction with a floating clip system. Mechanical Loc is available with minor ribs and comes in variable widths. Mechanical Loc requires on-site seaming.
