FORMA PLANK

STEEL WALL PANEL SYSTEM

STYLISH STEEL SIDING

The Forma Plank Steel Wall Panel System provides a stylish and clean look much like flat paneled siding but with the superior sustainability and durability of steel cladding. This hidden fastener panel comes in two widths with a coverage of either 6¼" or 8¼". Both panels feature a reveal of 1" and are installed with a floating clip system for thermal expansion and contraction. Forma Plank is ideal for small additions and residential buildings to large scale commercial, retail and multi-family projects.

Paired with our Woodgrain Series finishes, Forma Plank gives the same warmth and aesthetics of wood veneer or woodgrain vinyl siding but will not chip, fade or peel. Looking for a modern look without the wood? Our Forma Plank Wall Panel System is also available in over twenty 24-Gauge colours.

DESIGN INSPIRATION

Install in both horizontal and vertical lines to achieve a stunning modern look for interiors and exteriors alike.

CREATE SOMETHING AMAZING.
