

TEXTURED STEEL

Specialty Series

Colours You Can Actually Feel

Our **Textured Series** not only delivers eye-catching 3D visual effects to the product, but also provides a durable surface that is stronger and more scratch-resistant than standard pre-painted products.

This low-gloss finish **silicone-modified polyester (SMP) paint system** & texturized finish offers stronger colour retention and superior resistance to chalking and fading. Available in 24 Gauge steel.

NOTE: Forma Steel recommends viewing your steel sample prior to ordering. *Samples are available upon request.*
